The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/825,596	<b>Applicant(s)</b> GOH ET AL.	
	<b>Examiner</b> TECHANE J. GERGISO	<b>Art Unit</b> 2137	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 and 29 are drawn to a method and system of recovering target data by providing a first, second, third and forth **computing entity associated with their corresponding professional accreditations, trusted authority, organization and associated party** respectively and it is classified in class 713, subclass 170, 175 and in class 707, subclass 100.
  - II. Claims 23, 28, 43, 48 and 54 are drawn to a method and system to provide a secure data set including a first, second and third items **encrypted** according to an **Identifier-Based Encryption, IBE**, scheme in dependence on **encryption parameters** comprising a first, second and third **encryption key string** and it is classified in class 726, subclass 18 and class 380, subclass 277.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is a method and system of recovering target data by

Art Unit: 2137

providing a first, second, third and forth computing entity associated with their corresponding professional accreditations, trusted authority, organization and associated party; Group II is a method and system to provide a secure data set including a first, second and third items encrypted according to an Identifier-Based Encryption, IBE, scheme in dependence on encryption parameters comprising a first, second and third encryption key string.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their classification, restriction for examination purpose as indicated is proper.

4. Applicants are advised that the replay to this requirement to be completed must include an election of the invention to be examined even though the requirement can be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by fee required under 37 CFR 1.17(i).
